
INVITATION

Greetings,

The Viktoria Institute along with Volvo Group would like to invite you to its first security contest!

The target of this event will be provided by Volvo Group in the form of one of its newly developed and highly connected busses. Ideally, we want you to find security vulnerabilities the bus and “break” into its software in every way possible. Whether its knowledge, hacker enthusiasm or the opportunity to be part of something new, we would like for you to be a participant at this event.

Bring your ideas and skills and we will give you an open target with no restrictions to what and how you can attack. A unique opportunity to test new ideas and methods on a production commercial vehicle.

Who: Anyone can apply given they have a contract with a legal body (e.g. university, organization)

When: This event is scheduled to be conducted in the later parts of 2018.

Where: Gothenburg, Sweden

How: Apply by filling out the application form

Timeline: application – selection – signing of contract and non-disclosure agreement – information package sent out – event.

Applications will be reviewed by a jury and teams selected on the merits of their applications. A maximum of 10 teams will be chosen and will be notified of the decision via email.

We invite you to be the one of those who will be a part of this event.
